HOW WE WORK

EVERY FLOOR STARTS WITH THE PREP

01 MEASURE AND MOISTURE CHECK

We measure on site, test the slab for moisture and talk through the right system for the space.

02 DIAMOND GRIND

The slab is ground so the coating has a clean, open surface to bond to.

03 REPAIR

Cracks, chips and pits are filled and ground flush.

04 COAT

Primer and color coat built to full thickness, mixed for the day's heat and humidity.

05 TOPCOAT AND CURE

A clear topcoat seals it. Walk-on and full-use times are given to you in writing.

Built for Mississippi. Heat and humidity change how a coating cures, so we watch the dew point and slab temperature and schedule mixing for the cooler hours.

10X EPOXY

FLOORS THAT HOLD UP TO REAL USE

We install epoxy floor coatings, polished and stained concrete, new concrete patios and new flooring for homes and businesses across the Jackson metro.

- **Workmanship guarantee** on every floor we install.
- **Diamond-ground prep** before every coating, so it bonds to the slab.
- **Free written estimates**, measured on site with a moisture check.
- **Open 24 hours**, with nights and weekends for businesses.

OUR SERVICES

WHAT WE DO

EPOXY FLOOR COATING
Diamond-ground, repaired and epoxy-coated concrete for homes and businesses.

CONCRETE EPOXY FLOOR INSTALLATION
Epoxy installed on new or bare concrete, from slab check to final topcoat.

GARAGE FLOOR EPOXY COATING
Ground, repaired and coated garage floors that shrug off hot tires, oil and road grime.

COMMERCIAL FLOOR COATING
Warehouses, shops, kitchens and showrooms, scheduled around your operations.

CONCRETE FLOOR POLISHING
Ground, densified and polished bare concrete. Low upkeep and very durable.

FLOOR POLISHING
Dull, scuffed floors buffed and polished back to an even shine.

CONCRETE STAINING
Color worked into the concrete itself, sealed for patios, interiors and storefronts.

CONCRETE PATIO FLOOR INSTALLATION
New concrete patio slabs, formed, poured and finished on a properly prepared base.

FLOOR REFINISHING
Worn, scratched or failing floors cleaned up, repaired and recoated.

INSTALL FLOORING
New floors installed in homes and businesses, on a properly prepared subfloor.

PLAN AROUND IT

HOW LONG BEFORE YOU CAN USE IT

Epoxy floors: walk on	**About 24 hours**
Epoxy floors: park and full use	**About 3 to 7 days**
New concrete patio: light use	**About 7 days**
New concrete patio: full strength	**About 28 days**
Polished concrete	**Usually back in use the same day**

Times depend on temperature and humidity. You get yours in writing before the job starts.
